April 20, 1992.

Dear Josh,

I have no records of the 1946 CSH Symp., but I have a vivid recollection of that meeting, or perhaps a later one, at which you presented an overwhelming amount of material. My recollection is complicated by the fact that I was in the New York Hospital with Tb picked up in the lab when Dubos came back from a CSH meeting with news of your announcement of recombination. After I recovered I attended a CSH Symp. at which you described, in an extra evening session, one after another fascinating experiment. It went on for hours, until perhaps 11 PM, with a good-sized audience fixed in place despite the hour.

Sorry to be so vague.

Cordially,

Bernard D. Davis
